The following document provides a list of the commonly prescribed medications which are excluded from your formulary. This list represents an abbreviated version of the formulary associated with your prescription plan. It is important to note that this list is not exhaustive and does not guarantee coverage. Always review your prescription plan's detailed formulary for comprehensive coverage information, as certain medications may require prior authorization or may not be covered under your specific plan. Patients are encouraged to request generic medications whenever possible to reduce costs and should consult their healthcare providers or pharmacists for detailed coverage and treatment alignment.

Formulary Exclusions

Lasix

Please Note: Brand-name drugs may be reclassified as nonformulary if a generic version becomes available during the year. Coverage for specific medications, as well as the associated copayments, can change based on your plan and formulary updates. Be sure to reference your benefit materials regularly for the most up-to-date information on which drugs are covered. For questions about your prescription coverage, including details on specific drugs or copayment amounts, you are encouraged to contact LucyRx using the phone number listed on your member ID card.
