

The following document provides a list of the commonly prescribed medications. This list represents an abbreviated version of the formulary associated with your prescription plan. It is important to note that this list is not exhaustive and does not guarantee coverage. Always review your prescription plan's detailed formulary for comprehensive coverage information, as certain medications may require prior authorization or may not be covered under your specific plan. Patients are encouraged to request generic medications whenever possible to reduce costs and should consult their healthcare providers or pharmacists for detailed coverage and treatment alignment.
